

Making Sculptures: The Chair And Me

[<< Back to AccessArt & Saatchi Learning <<](#)

In this activity we challenge you to make sculpture inspired by your bodies relationship to the furniture around you. This is a great opportunity to work instinctively and on a slightly larger scale, making sculpture which will be dismantled afterwards.

Notes for Teachers

- This activity is suitable for ages 8 to 16 (upper Key Stage 2, 3 and 4).
- You can use the activity as a standalone session (1 hr) or extend and develop work over a series of sessions.
- See other resources in the "[AccessArt & Saatchi Learning](#)" series to extend your exploration of contemporary sculpture.
- As the sculptures will be dismantled at a later date, the aim of this session is to build quickly and intuitively, freed from the constraint of having to "craft" an object. This session is about helping children and teenagers understand how they can "sketch" in 3 dimensions to explore the physicality of

making (and viewing) sculpture.

To Begin...

Gather materials, for example:

- Cardboard
- Sticks/canes
- Wire
- Tape
- String
- Glue Gun
- Pliers
- Scissors
- Each pupil also needs a stool or chair to use as part of their sculpture (the piece of furniture will be returned after the session).

Take a chair or stool and gather together your materials. Please remember when you build around the piece of furniture not to directly attach your sculpture to the stool or chair!

Have a think about your relationship with the chair or stool:

- How does the piece of furniture make your body act?
- How do you sit on it or lean on it? Be creative!
- What's your favourite position to sit in?

Start cutting or tearing your materials into pieces (strips, rectangles, triangles etc) and start exploring how you might build and connect with these elements to make a sculpture about how your body interacts with the furniture.

Don't try and build a sculpture "of your whole body" instead think in terms of gestures – big shapes which take up space and indicate your body might be, and what your body might be doing. Think about gravity and how your body sits on the chair, and think about how your legs might hang or rest.

Do you need to include an arm to show how your weight is distributed? Think about the bits of

your body you don't need to include too.

Remember not to fasten the sculpture to the chair or stool!

If you don't want to use actual stools and you would prefer to work on a smaller scale you might like to build a small piece of furniture and work from that:

Once you have finished your sculpture, [move on to Step 3: Reflect & Discuss](#)

Making Mini Sculptures that “Belong To The Ground”

Making Sculptures: Enclosing Space

Teenagers explore making interior spaces in a variety of media and use visualisation to imagine internal spaces. [Full AccessArt Members Only](#)

Reaching the Limit: Making Tall Sculptures and Stretching Materials

Building larger than life, vertical sculptures to push teenage students' understanding of sculptural relationships such as balance and the object's relationship to the ground. [Full AccessArt Members Only](#)

Standing Up! – Making Vertical Sculptures and Working from the Base

Teenagers explore building a 'vertical' sculpture, from the base up, exploring the relationship of a structure to its base and gravity. [Full AccessArt Members Only](#)

Experimenting with Mixed Media and Exploring Materials

The importance of investing time into the exploration of materials and experimentation with a broad range of media. [Full AccessArt Members Only](#)

Landscape Sculptures in Wire and Mixed Media: Working Through Ideas

Using modelling wire and modroc or masking tape to construct landscapes and using drawing to support the making process. [Full AccessArt Members Only](#)

Drawing and Making: Drawing to Feed Making – Making to Feed Drawing

How integrated sketchbook work or drawing can be used to develop creative projects such as making sculpture. Working with drawing and making in parallel. [Full AccessArt Members Only](#)

Making Lanterns with Tissue Paper and Wire

How to work with modelling wire, tissue paper, PVA glue and ink to make seasonal, sculptural lanterns. [Full AccessArt Members Only](#)

Drawing Insects in Wire and Tracing Shadows in Black Pen

Using wire to help interpret form and make line drawings in black pen. [Full AccessArt Members Only](#)
