

Modelling The Head in Clay – by Melissa Pierce Murray

Artist [Melissa Pierce Murray](#) led a series of workshops for AccessArt's Experimental Drawing Class in which the teenagers modelled a head in clay. There are four resources in this series, beginning with constructing an armature and making preparatory drawings, then studying the bone structure of the skull before moving on to features.

The work was done over 8 sessions of 75 minutes each, but could be adapted to two or three longer sessions. The workshops took place at over a term at [Cambridge ArtWorks](#).

Part One - Armature

Teenagers construct simple armatures out of cardboard and build a form for their clay heads out of paper and clay. [Read More](#)

Part Two - Preparations

__This post looks at two preparations for making a clay head: drawing to help us learn to see the form in the round, and taking measurements from life. [Read More](#)

Part Three - Skull

__In this post we concentrate on developing the shape of the cranium and forehead, the structure of the eye sockets, cheekbones, jaws and teeth. Referring to anatomical drawings or to a model of a skull will help students begin to see this bony underpinning to the skin and muscles of the head. [Read More](#)

Part Four - Features

We look at how to form the features: eyes, ears, mouth. We look at ways to finish and embellish the form using hair, clothing or inventing horns. In the class we talked about how the muscles attach to the bones, and how the skin smooths over the surfaces. [Read More](#)

This is a sample of a resource created by UK Charity AccessArt. We have over 1500 resources to help develop and inspire your creative thinking, practice and teaching.

AccessArt welcomes artists, educators, teachers and parents both in the UK and overseas.

We believe everyone has the right to be creative and by working together and sharing ideas we can enable everyone to reach their creative potential.
