

# One Material: Sea Sculptures from Plastic Bottles

By Andrea Butler

The plastic pollution in our seas and oceans is an important environmental issue and it led to a conversation at AccessArt as to whether we could construct an object in one recyclable plastic material with nothing else added (PVA, stapes, masking tape etc) so that the whole thing could be recycled in one go. Taking inspiration from the sea, I collected a selection of recyclable milk bottles and water bottles and using only the bottles, labels and the tops, made a collection of sea sculptures.
