

Talking Points: Henry Moore – Drawing in The Dark

A collection of sources and imagery to explore the coal mining drawings made by Henry Moore.

Please note that this page contains links to external websites and has videos from external websites embedded. At the time of creating, AccessArt checked all links to ensure content is appropriate for teachers to access. However external websites and videos are updated and that is beyond our control.

Please [let us know](#) if you find a 404 link, or if you feel content is no longer appropriate.

We strongly recommend as part of good teaching practice that teachers watch all videos and visit all websites before sharing with a class. On occasion there may be elements of a video you would prefer not to show to your class and it is the teacher's responsibility to ensure content is appropriate. Many thanks.

Henry Moore

Henry Moore is best known for his sculptures and Shelter drawings, but in 1942 Moore also created a series of sketches from Wheldale Colliery, where his father had worked. Moore spent one week drawing from observation down the dark coal mine, and then created drawings, combining memory with observation.

Moore reflected upon his experience, stating “I now like black for its blackness – for its strength, its drama, its seriousness (and unsweetness).” – *C. Owen, Drawing in The Dark: Henry Moore’s Coalmining Commission, 2022, p.136*

Pit Notebook

In his Pit Notebook, Moore would create preparatory sketches. He would also make notes, jotting down what he could see or words that came to mind as he drew. On the pages of his Pit Notebook he would quickly carve out the space, creating a sense of what it was like down the coal mine in Castleford.

Some of the sketches focus on figures and others on the environment.

These preliminary drawings were pivotal in the

development of final drawings. Moore would piece together the different sketches, considering the notes he had jotted down and how he had felt within the space to create a complete drawing.

Explore a selection of Moore's Pit Notebook sketches below.

Quotes From Henry Moore

Here you will find some quotes by Henry Moore referencing his developmental drawings. You may use these quotes as prompts for some activities from the “An Exploration of Coal Mining Through Henry Moore” pathway, or just use them for discussion.

“There was the problem of getting form out of darkness – of making the light from the miners’ helmet-lamps produce figures out of thick blackness – of drawing in the dark.” *C. Owen, Drawing in The Dark: Henry Moore’s Coalmining Commission, 2022, p.136*

“The blackest chalk or ink is grey compared to the pitch blackness of complete darkness.” *C. Owen, Drawing in The Dark: Henry Moore’s Coalmining Commission, 2022, p.67*

“To record in drawing what I felt and saw was a very difficult struggle. There was first the difficulty of seeing forms emerging out of deep darkness, then the problem of conveying the claustrophobic effect of countless wooden pitprops, 2 or 3 feet apart, receding into blackness.” – *C. Owen, Drawing in The Dark: Henry Moore’s coal mining Commission, 2022, p.67*

“As each drawing develops, it is like going outside from a lighted room on a dark night – at first seeing nothing, then slowly distinguishing

objects and distances – sensing space with unknown depths.”- *C. Owen, Drawing in The Dark: Henry Moore’s Coalmining Commission, 2022, p.8*

“The white of the paper showing through the black chalk gives off light (almost real light) like the night sky reflected in water.” – *K. Clark, Henry Moore Drawings 1974, p.292*

Questions to Ask Students

What kind of marks can you see?

How would you describe the atmosphere?

What do you think Moore was trying to capture in the image?

How do you think Moore might have felt drawing in the coal mine?

How do the preparatory sketches feed into his final sketches? Can you see any similarities or

differences?

Questions by [Laura McKendry](#)

What impact do you think sketching in a contained, hot, dark space such as an underground mine would have had on Moore's drawings?

Henry Moore is known for his sculptures of the reclining female form. How would drawing miners at work have differed from his usual subject?

What atmosphere is Moore trying to evoke in these drawings? How do his marks contribute to the overall feel of the images?

Explore Laura McKendry's resource "[Expressive Charcoal Collage: Coal Mines](#)".

Many thanks to AccessArt trustee, Chris Owen, for

the inspiration behind this Talking Points.

'Chris Owen's comprehensive account of the coalmining drawings explores every aspect of the commission – from Moore's return to his childhood home and the challenges associated with 'drawing in the dark' to the significant influence of the project on Moore's later work, including the Warrior and Helmet Head sculptures, and his little-known illustrations to W.H. Auden's poetry' – Find Chris's book [here](#).
